

PLAN NO. 2 – SEDONA & BRYCE CANYON RR

Interchange track is also useful as a connection to a yard or a larger layout

Center backdrop separates the mine/smelter scenes

Consider cutting a few holes in the plywood to form dry washes. Also think about changing the grade between the two mains

A second spur at bottom can make connecting to a larger layout even easier

Note that the track is not parallel to the layout edge, which greatly improves the appearance

Lionel no. 37124 operating sawmill

Building a tabletop with curved corners will improve the appearance and accessibility of all four layouts
