

GD LINE

	TT	HO	S	O
Size of squares:	18"	24"	36"	48"
Minimum radius:				
Main	19"	20"	30"	52"
Branch	10"	14"	21"	28"
Narrow-gauge	—	16"	24"	32"
Trolley	—	5"	8"	10"

- Gorre & Daphetid
- Devil's Gulch & Hellenon (narrow-gauge)
- Dual gauge (GD, DG&H)
- Cooper Electric
- ⊙ Elevations in inches from floor ⊠ Support posts

Portions of railroad in the lower left corner of the plan are unfinished, so the track shown just above Daphetid forms a temporary mainline connection from Gorre to Great Divide. This will provide a connection for continuous running if it is wanted later. The room is roughly 23 x 27½ feet, but with a jog across the middle so that the full length is actually 32½ feet. This jog also provides for good aisle arrangement and more sweeping runs of main track through Squawbottom and vicinity than would be possible in a simple rectangular room having the same area.
